where the board of trade of that great city of the plains took charge of the delegation and entertained them in true royal style. Here the New Mexicans were given a sumptuous dinner, a drive about the city to view the magnificent business structures, elegant residences, wide streets, fringed with beautiful trees on either side, the great packing houses and many other features stalwart and sublime. Wichita is a city of 40,000 souls, with the enterprise and pushitiveness of Denver and the pretensions of Chicago, aithough not in the field as a candidate for the world's fair.

The building of a large city on the plains where the buffalo roamed only a few years ago, is easily accounted for, however. It is located in the banner wheat growing country of the state, and the immense comfields for 200 miles around the city yield eighty to 100 bushels per acre. The city is governed honestly and with the capacity of statesmanship. She has an able mayor and council, with a board of trade that would be a credit to a city of 100,000 people. In fact the energy, which seems infectious among the Wichita neonle, would make woman in our day who could play Viola with pathos as well as sparkle, and she is woman in our day who could play Viol-with pathos as well as sparkle, and she is dead. size seems to have been limited only by the capacity of the big house.

The same old delicate thread of a so-called plot runt through the reorganized "Fantasma," but upon it are strong novel-ties, marvels and elsever features without number. It is a piece of the order that when one is not well-nigh stupefied with astonishment he is rearing with laughter. Marvels and mirth pervade the production in about equal quantities. The most important changes are in the first act, where an entire new scene is added. This is an entire new scene is added.
